

Highlights

System features

Professional & flexible

Specially designed for access control and time attendance management needs, the platform suits applications and scenarios for small- to medium-sized businesses, bringing flexible solutions for both employees and managers.

Easy to operate

With a clear setup wizard, managers can quickly configure and run HikCentral Access Control based on their actual needs.

Lightweight & convenient

Users can get full functionality even using basic hardware and common web browsers. What's more, users can also manage remo-tely with an intuitive mobile app.

Benefits for key roles

Easy & convenient For employees

Employees will get through gates and take attendance at the workplace more efficiently via multiple authentication methods. They can check their own attendance results quickly and apply for exceptions on the portal or mobile app without the need to interrupt their supervisors.

Easy & convenient for employees

Employees will record their attendance at the workplace more efficiently via multiple authentication methods. What's more, employees on-the-go can flexibly punch in remotely via their mobile phone. They can check their own attendance results quickly and apply for exceptions on the portal or mobile app without the need to interrupt their supervisors.

Efficient & intuitive For HR & management staff

User-friendly interfaces and quick setup wizards help supervisors manage employee attendance with great flexibility. They can also arrange shifts and schedules easily. Human resource personnel will enjoy the diverse report template types and automated paper size & orientation when printing.
