

PSB007

Power Supply w/Battery Charger

An enhanced version of power supply with battery charger in metal housing for access controller & alarm hubs.

Specifications

- Suitable to use to power up door access terminal, door electronic magnetic lock, burglary alarm hub and etc.
- Provides a consistently power output of DC12V 5A.
- Well tested it working well with providing a stable power rating to 1* face recognition door access terminal and 2* double electromagnetic lock .
- Built-in an adjustable timer relay (0~10 seconds) output to electromagnetic lock.
- An adjustable power output (DC11~14V) to power up different type of devices.
- Maximum Power Output (Wattage): 60W.
- Supports to connect and fit a standard DC12V 7Ah battery size in the metal enclosure .
- Terminal Connection: NC/NO/COM (wet contact), Push & Com (exit button), Aux Input (fire alarm) & Bat+/Bat- (back-up battery).

Product Features

Product Model	PSB007	Output Timer	0 ~ 10 seconds
Power Input	AC240V 50Hz	Working temperature	-20°C ~ 60°C
Power Output	DC11~14V	Working humidity	5% ~ 90%
Output Current	5A	Product size Gross Weight	(H)217mm x (W)167mm x (D)71mm 1kg
